

Lab Assignment: Flowchart and Java Programming

Flowchart + Java Program Questions

1. Check Positive Number:

Flowchart:

Code:

```
class PositiveNum{
    public static void main(String []args){
        int num = 5;
        if (num>=0){
            System.out.println("The number is positive");
        }
        else{
            System.out.println("The number is not positive");
        }
    }
}
```

Output:

2. Check Negative Number:

Flowchart:

Code:

```
class NegativeNum{
    public static void main(String []args){
        int num = -3;
        if (num<0){
            System.out.println("The number is negative");
        }
        else{
            System.out.println("The number is not negative");
        }
    }
}
```

Output:

3. Check Odd or Even Number:

Flowchart:

Code:

```
class OddEven{
    public static void main(String []args){
        int num = 4;
        if (num%2==0){
            System.out.println("The number is even");
        }
        else{
            System.out.println("The number is odd");
        }
    }
}
```

Output:

```
Windows PowerShell
PS C:\Users\sairajkale\OneDrive\Desktop> javac OddEven.java
PS C:\Users\sairajkale\OneDrive\Desktop> java OddEven
The number is even
PS C:\Users\sairajkale\OneDrive\Desktop> |
```

4. Display Good Morning Message Based on Time:

Flowchart:

Code:

```
class Time{
public static void main(String []args){
    int time = 8;
    if (time>5){
        if(time<12){
            System.out.println("Good Morning!");
        }
    }
    else{
        System.out.println("It's Not Morning!");
    }
}
}
```

Output:

```
Windows PowerShell
PS C:\Users\sairajkale\OneDrive\Desktop> javac Time.java
PS C:\Users\sairajkale\OneDrive\Desktop> java Time
Good Morning!
PS C:\Users\sairajkale\OneDrive\Desktop> |
```

5. Print Area of a Square:

Flowchart:

Code:

```
class SquareArea{
    public static void main(String []args){
        int side = 4;
        int area = side * side;
        System.out.println("The area of square is "+area);
    }
}
```

Output:

6. Print Area of a Rectangle:

Flowchart:

Code:

```
class RecArea{
    public static void main(String []args){
        int length = 4;
        int width = 2;
        int area = length * width;
        System.out.println("The area of rectangle is "+area);
    }
}
```

Output:

7. Find the Largest of Three Numbers:

Flowchart:

Code:

```
class GreatNum{
    public static void main(String []args){
        int A = 9;
        int B = 8;
        int C = 6;
        if(A>B && A>C){
            System.out.println(A+" is the greatest value");
        }
        else if(B>C){
            System.out.println(B+" is the greatest value");
        }
        else{
            System.out.println(C+" is the greatest value");
        }
    }
}
```

Output:

```
Windows PowerShell
PS C:\Users\sairajkale\OneDrive\Desktop> javac GreatNum.java
PS C:\Users\sairajkale\OneDrive\Desktop> java GreatNum
9 is the greatest value
PS C:\Users\sairajkale\OneDrive\Desktop> |
```
